

Umbrella Liability

Insurance coverage is a source of protection that supplements the limits of an insured's underlying policies such as general liability, auto liability,

employer's liability and even liquor liability. It can also provide broadened coverage where primary coverage doesn't apply.

At AMW we have several options available when you need to place an umbrella or excess policy. Below are some facts about the markets we have available to use:

- A.M. Best rated A-8 or better
- Admitted markets available
- Capacity up to \$25,000,000
- Minimum Premiums starting at \$500 per million for many classes
- Lead Umbrella and excess liability capacity including auto liability
- Auto Buffer Layer is available (minimum attachment point is \$500,000)

Many quotes can be turned around in 24 hours. In order to meet that goal we must have a complete submission including a completed application showing underlying premium, underlying carrier information and loss history.

All classes of business are considered
